(57)	<i>Abstract:</i>		

A PoolPay billiard release mechanism system for pool table gaming, featuring advanced technology seamlessly integrated with traditional gameplay mechanics. The system includes billiard proximity sensors, a centralized control unit, and a precision-engineered servo motor with a pulley system. Players can initiate game sessions effortlessly by tapping RFID cards or using USSD commands, allowing the control unit to manage real-time transactions and deduct credits from user accounts. Upon payment confirmation, the servo motor tilts the ball tray to release billiards onto the table with precision. This innovation modernizes the payment process and enhances the overall gameplay experience, setting a new standard for pool table gaming systems.
